**WOODWORKING FASTENERS**

Intertek Industrial Corp. is a premier supplier of woodworking fasteners.

- Large Inventories
- Quality Products
- Same-Day Shipping
- 98% Order Fill Rate
- Value-added Distributor Programs Designed to Promote Re-sell Opportunities and Increase Profits.
  - > Enhanced Packaging and Labeling
  - > Supportive End-User Marketing Material
  - > Simple, Efficient Part Number System
  - > Unparalleled Customer Service

IIC IS A GROWTH ORIENTED COMPANY SEEKING LONG-TERM SUPPLY CHAIN PARTNERS.

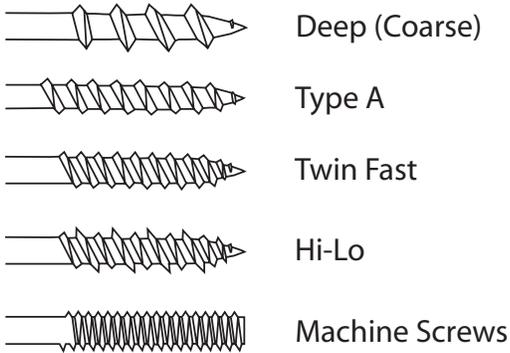

Intertek Industrial Corp. has earned a reputation as a respected supplier of quality products servicing multiple markets from stock. Over the years, we have developed long lasting business relationships through superior product knowledge, flexibility and friendly courteous service.

By understanding the requirements of our customers, we are well positioned to supply the quality products they need, when they need them. It has always been our objective to develop “Value-added” supply programs that encourage and assist our customers in improving their bottom line performance.

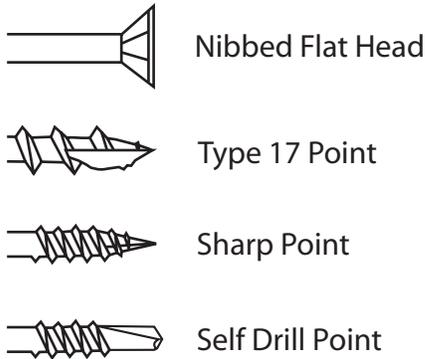

We look forward to servicing you and know that you will enjoy doing business with us.

## WOOD SCREW THREAD TYPES

The preferred choice for most woodworking applications. Aggressive threads maximize holding power in softwoods, particle board, and MDF board.
Traditional sheet metal thread. Good for multiple applications in wood and metal and commonly used in harder woods to prevent splitting.
Double lead thread decreases drive time compared to single lead thread designs. Good for hardwood fastening applications involving longer length screws.
Specialty thread originally designed for plastics used on a small variety of wood screw applications.
Standard machine screw threads to fit mating part applications such as mounting drawer pulls.

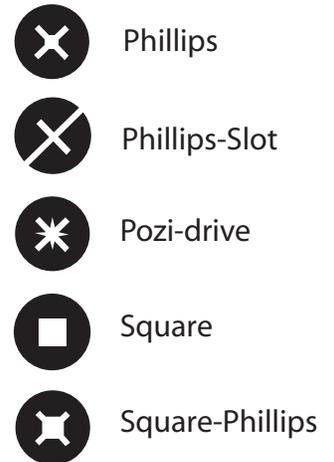

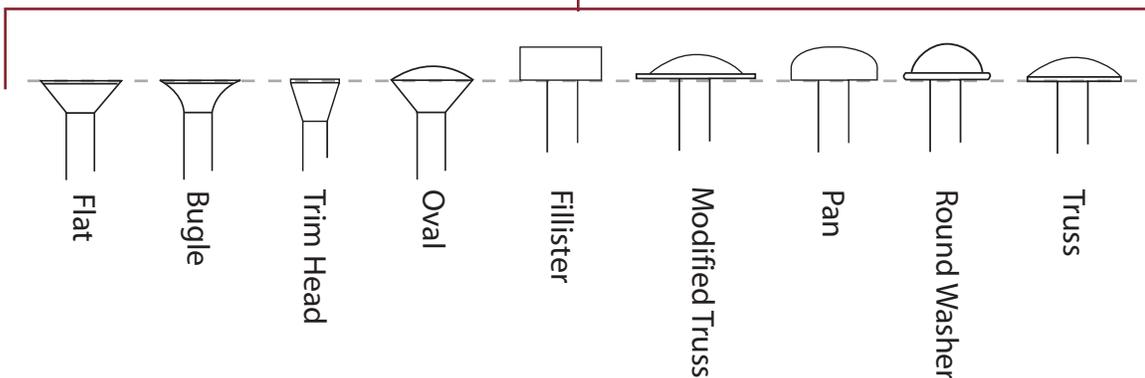

## WOOD SCREW FEATURES

Built-in Nibs under the head assist the fastener to self-countersink the screw head without pre-boring.
The self-drilling point for wood applications. Prevents splitting and bursting of wood particularly for softwoods, particle board, and MDF board by displacing excess wood material from the drilled hole.
Tapered points on deep threaded screws for thin material applications allow fastener to pierce surface for easy starting.
Self-piercing point for light, medium and heavy gauge metal studs

## FLAT SQUARE DRIVE NIBBED (TYPE 17) DEEP THREAD SCREWS "THE ULTIMATE"

*The best wood screw on the market and the preferred choice for superior performance.*

This screw combines the enhanced drivability of the "square recess," easy penetration of the "Type 17" point, and "Nibs" to help countersink the screw.
