THIS IS MAXIMO THERMO

And this is what wood looks like when it's pushed to its full potential.

Every board in this catalog has been transformed – not just modified. Through heat, steam, and nothing else, **Maximo** redefines what's possible with wood. The result? Ultra-stable, chemical-free, design-forward material built to meet the demands of modern architecture.

Explore a portfolio that delivers timeless beauty with cutting-edge performance – from clean profiles to bold textures, every line is crafted with intention and backed by nature, science, and sustainability.

Thermo x Domestic Wood

ABOUT MAXIMO THERMO

We don't just
make wood better.
We take it further.

Maximo Thermo is where sustainability meets ambition. Our wood is modified using only heat and steam – no toxins, no shortcuts – to unlock a higher level of durability, stability, and beauty. It's precision-made for professionals who expect more.

And we stand behind it: every **Maximo Thermo** product comes backed by a 20-year warranty, because we believe sustainability should come with certainty.

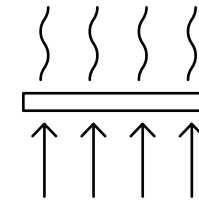

Whether you're transforming walls, elevating ceilings, or cladding the next modern landmark, **Maximo Thermo** gives you the confidence to build boldly and responsibly.

Maximo Thermo Ayous

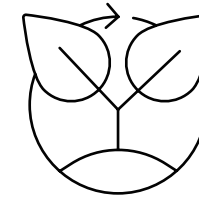

WHAT WE **STAND** **FOR**

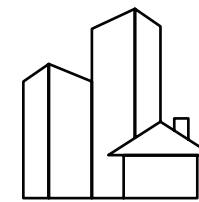

Radical Innovation

We push thermal modification to its edge – and beyond – to create high-performance wood that's naturally better.

Real Sustainability

Sustainably harvested. Certified by the world's most trusted forestry authorities. And built to last for decades, not just years.

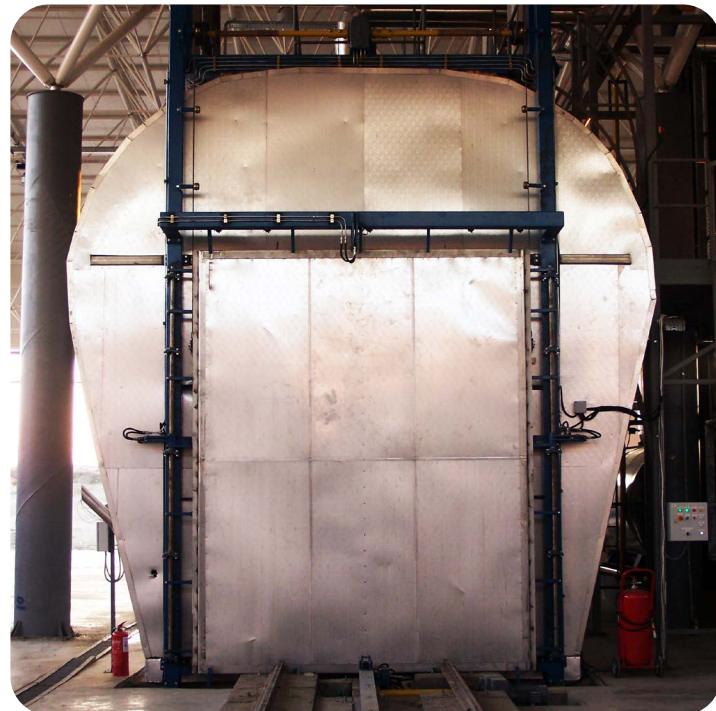

Designed for Everyone

From signature builds to everyday spaces, **Maximo Thermo** makes premium performance accessible. Because great design shouldn't come with limits.

WHAT SETS **MAXIMO** **THERMO** APART

Performance by design.
Sustainability by default.

At **Maximo**, every detail matters – from forest to facade.
Here's what makes our wood different from anything on the market:

- Up to 300% less moisture than untreated lumber, for extreme dimensional stability
- Just thermal science and uncompromising standards
- With select products FSC®-certified, all wood is sourced from sustainably managed forests
- Crafted for the trade. Favored by architects, loved by installers

This isn't off-the-shelf wood. It's **Maximo Thermo**.
Where science meets craftsmanship, and form always follows performance.

THE LEGITIMATE THERMO PROCESS

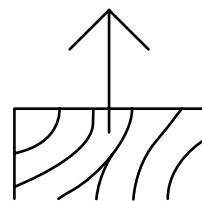

Just heat, steam, and precision.

At the core of every **Maximo** board is the patented Thermo process – a clean, high-heat transformation that permanently changes the wood at a cellular level. By removing sugars, resins, and moisture, we don't just enhance the wood – we evolve it.

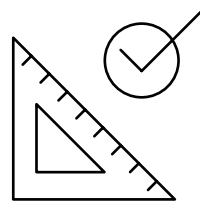

What you get is a material that's more stable, more resistant, and architecturally striking – without a drop of synthetic treatment. The wood deepens in color, tightens in grain, and gains an entirely new level of performance. It's real wood. Just smarter.

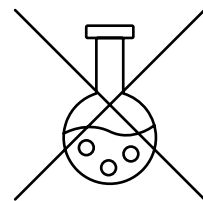

LIGHTWEIGHT DESIGN

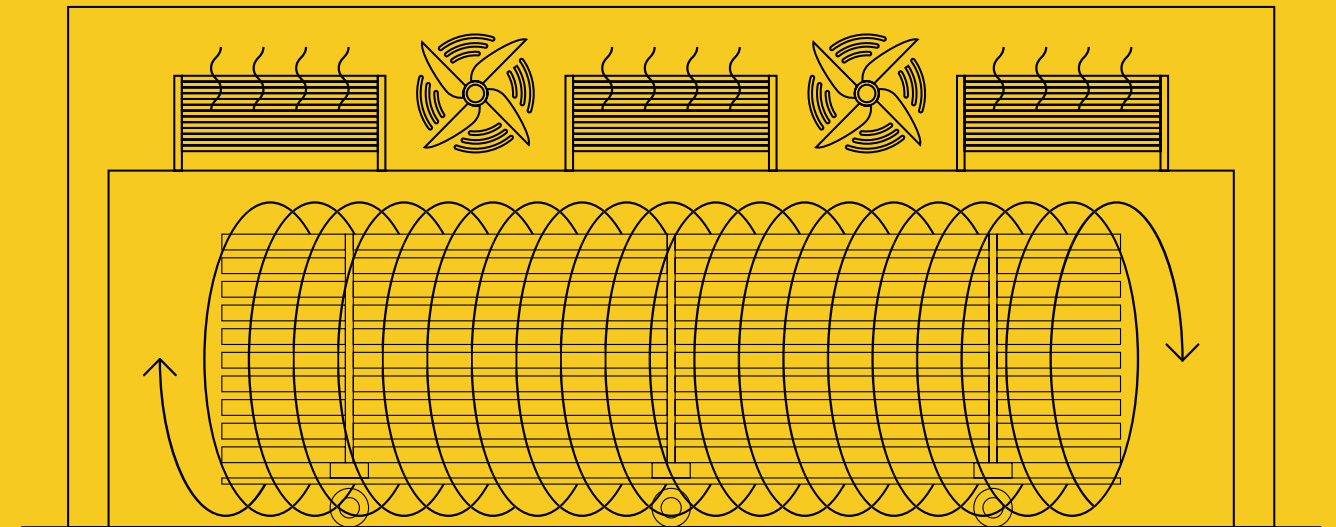

ULTRA STABILITY

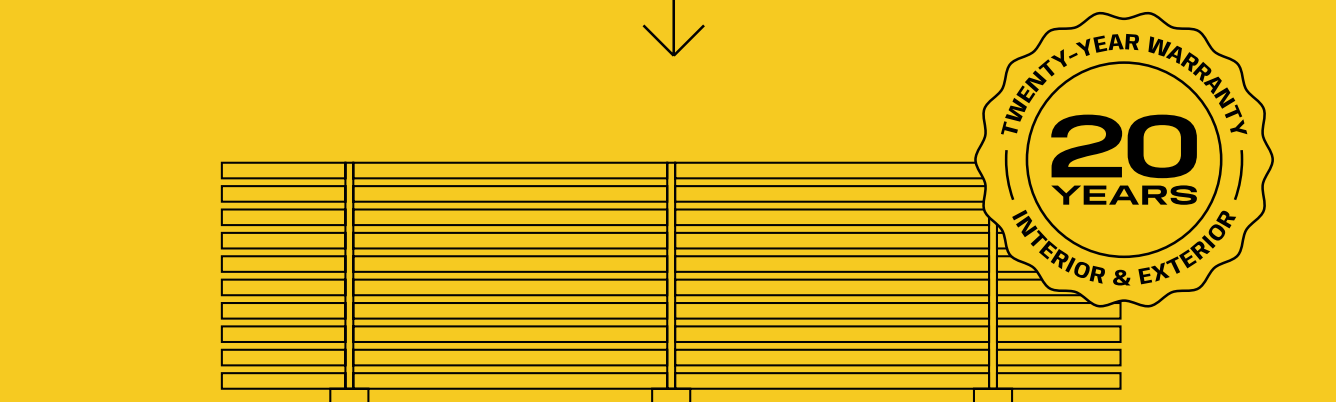

QUICK & EASY INSTALLATION

CHEMICAL FREE

- 1 Heat & Dry**
The wood is gently dried with steam and hot air, reducing moisture and preparing it for transformation – all without chemicals.
- 2 Thermal Treatment**
Heated up to 413.6°F in a controlled steam environment, the wood's structure changes – making it more stable, durable, and naturally resistant to decay.

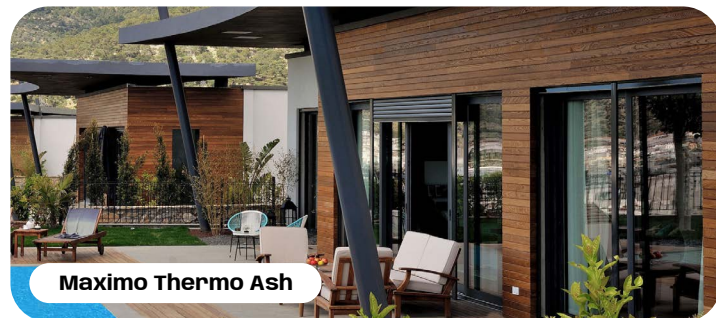

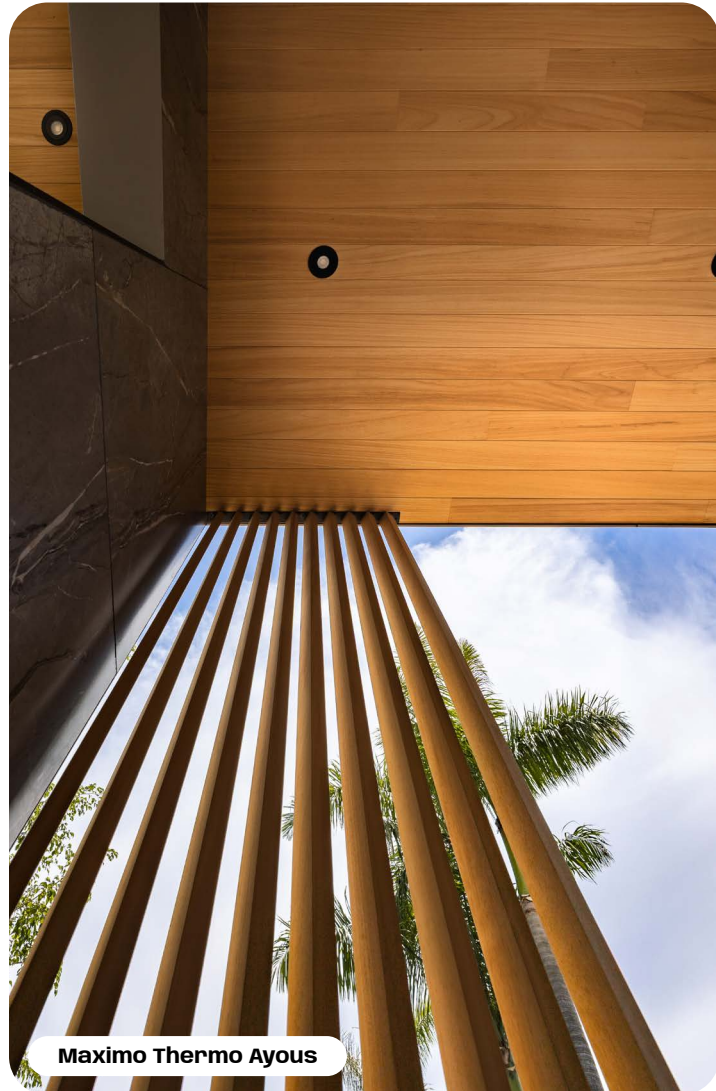

- 3 Ready to Perform**
After cooling and conditioning, the result is **Maximo Thermo**: eco-friendly, low-maintenance, and built to last in any climate with a 20-year warranty for indoors and out.

OUR SPECIES

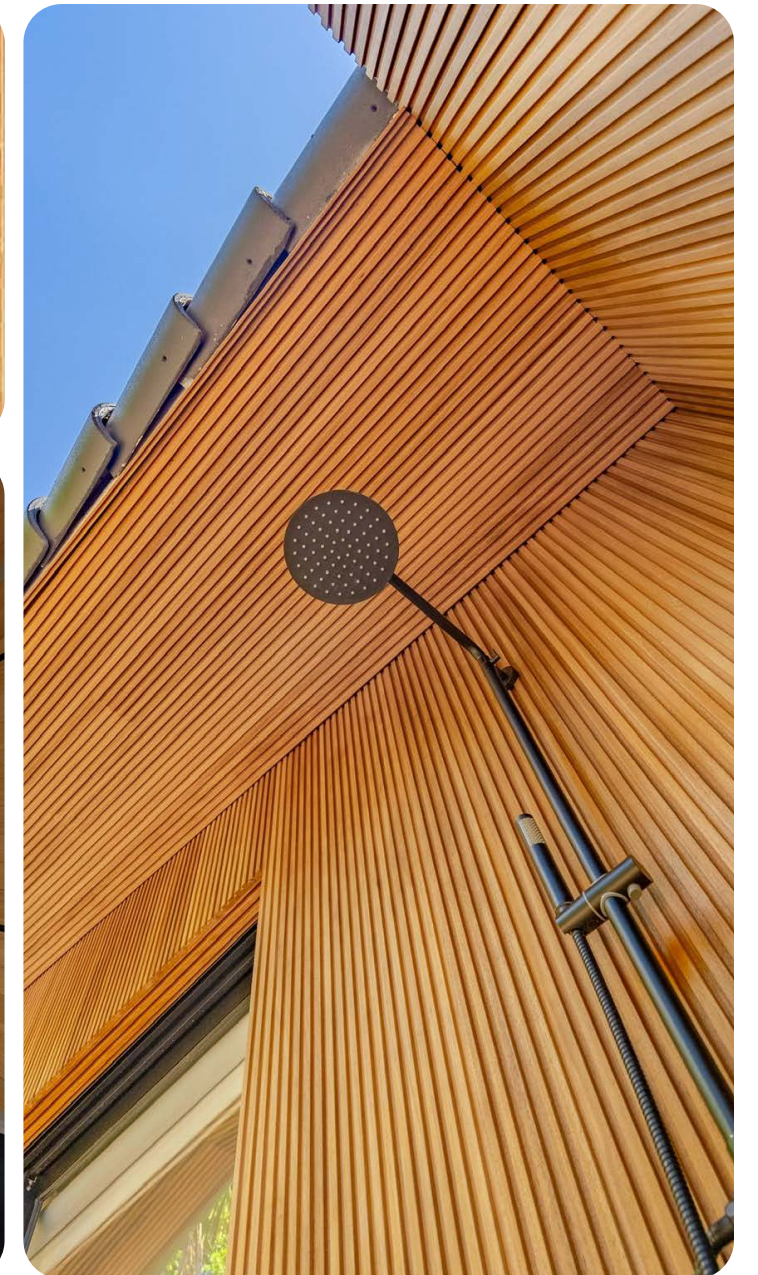

Every product starts with raw potential. We just take it all the way.

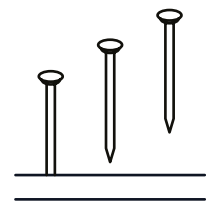

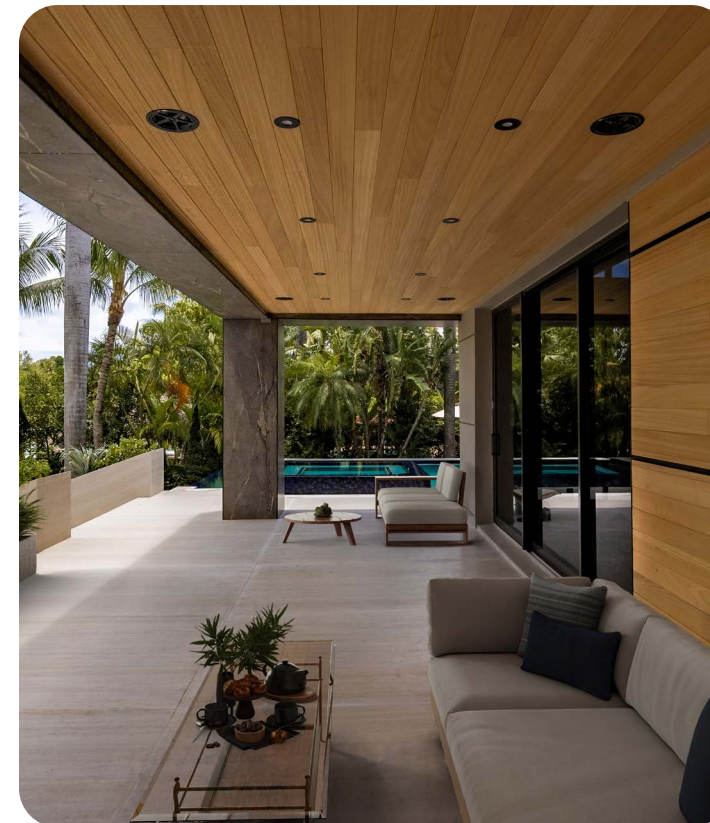

Here's where beauty meets backbone. The **Maximo Thermo** portfolio features distinct product lines designed for specific architectural applications – all modified with patented Thermo process, all built for lasting impact with a 20-year warranty, indoors and outdoors. Whether you need clean lines, bold grain, or modern warmth, each product here is a solution, and not just a surface.

MAXIMO THERMO **AYOUS**

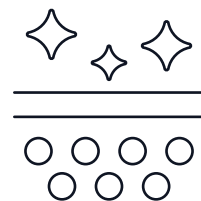

Soft to the touch.
Strong where it counts.

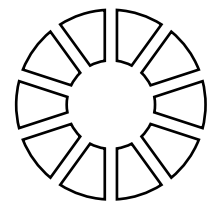

AyouS brings warmth and elegance to every surface it touches. Its gentle texture and golden tone are ideal for refined facades, ceilings, and architectural details – especially in spaces where aesthetics carry weight. Don't let its lightweight fool you. Thermo AyouS is built to endure, offering thermal stability, weather resistance, and sustainable sourcing – all wrapped in quiet luxury.

MAXIMO THERMO **CLEAR RADIATA**

Clean. Consistent.
Surprisingly capable.

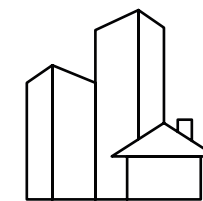

Thermo Clear Radiata is the minimalist's choice – a lightweight, smooth-grained softwood that's all about clean lines and versatility. Thermally modified for strength and stability, it's a go-to for cladding, ceilings, and decking where uniformity matters.

Clear Radiata offers a smooth, consistent look with minimal knots—ideal for modern designs. Lightweight, easy to work with, and highly resistant to moisture and decay, it performs reliably across climates.

MAXIMO THERMO **ASH**

Bold grain. Brutal strength.
Built for impact.

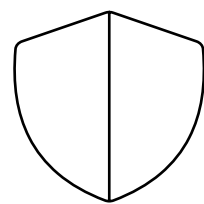

Thermo Ash is where beauty meets muscle. Dense, durable, and strikingly patterned, it's made for exterior applications that demand presence – from modern facades to heavy-use decking.

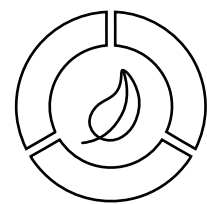

The thermal treatment deepens its tone, locks in its strength, and elevates its natural resistance. FSC®-certified and Class 1 durable, this is premium hardwood redefined.

MAXIMO THERMO **SCANDINAVIAN**

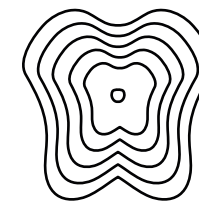

Distinctive Grain. Nordic toughness.
Naturally elevated.

Scandinavian Thermo comes with a competitive price and delivers the best of Nordic forestry: straight grain, consistent texture, and thermal durability forged in colder climates. It's engineered for vertical and horizontal applications where symmetry, simplicity, and long-term performance matter.

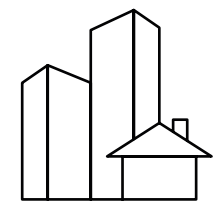

Think modern facades, clean siding runs, and smart sustainable builds – all certified, all chemically untreated.

SIDING & CEILING

Statement Surfaces.
Seamless Flow.

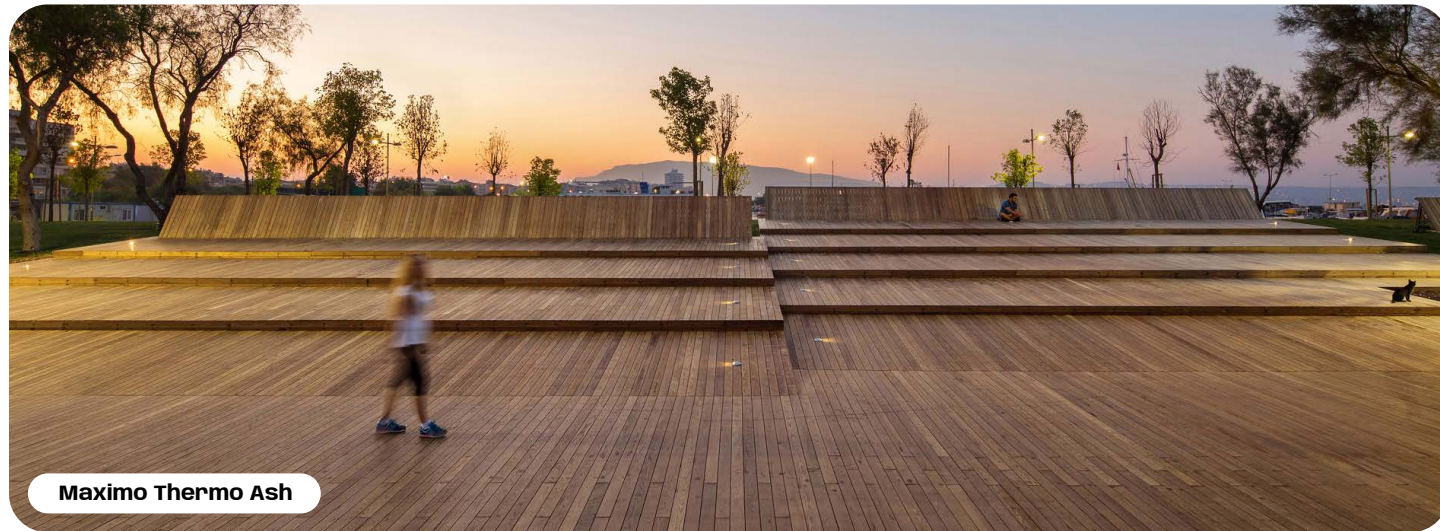

From interior feature walls to exterior ceiling details, **Maximo Thermo** brings visual warmth and architectural clarity to every surface. Light, stable, and beautifully grained, it's made for modern spaces, indoors and out.

- Ideal for accent walls, ceilings, and design-forward applications
- Consistent profiles for a clean seam look
- Thermo treated for lasting performance
- FSC®-certified and available in all species

DECKING

Build Beautiful.
Walk Barefoot.
Never Look Back.

Maximo Thermo decking isn't just made to last – it's made to live on. Thermally modified for deep stability and natural resistance, it holds up against moisture, rot, and time without the need for harsh chemicals.

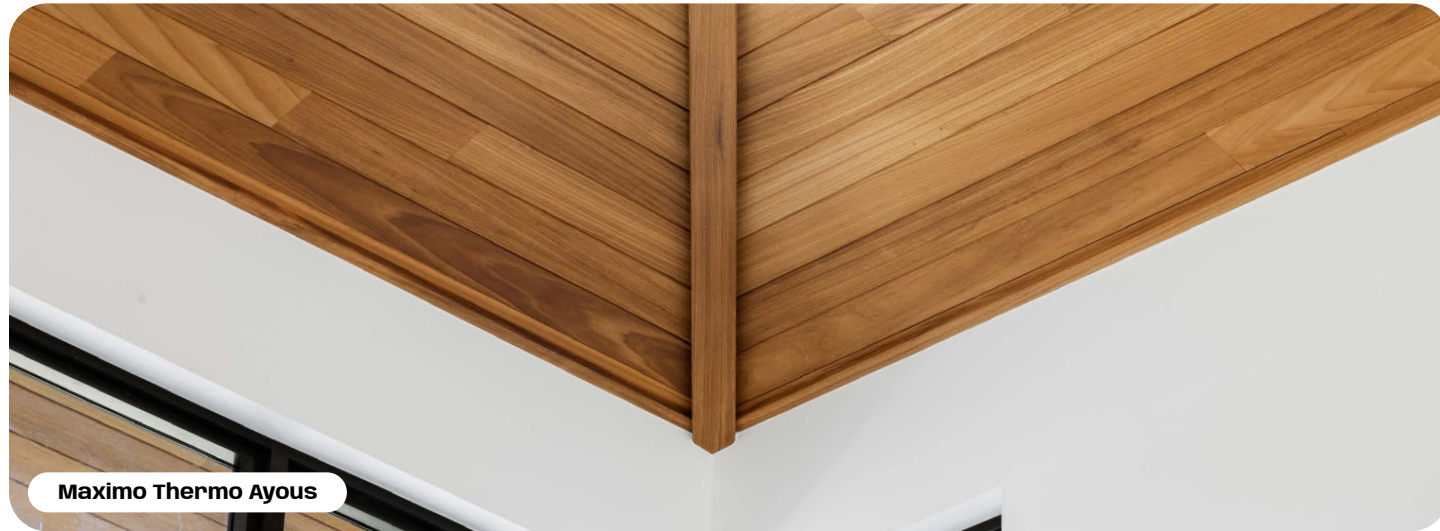

Whether you're after rich grain or a smooth, consistent surface, **Maximo** decking elevates outdoor spaces with FSC®-certified wood that's barefoot-friendly and built to age with grace.

- Thermo Ash for bold grain and high strength
- Thermo Clear Radiata for clean texture and easy handling
- Low maintenance, high durability
- 100% chemical-free

	PROFILE	NOMINAL SIZE	NET SIZE	AVAIBLE LENGTHS	SPECIES	FINISH / TREATMENT

TRIM & MOULDING

The Finishing Touch.
With Nothing Left to Prove.

Maximo Thermo trim and moulding bring polish and performance to every edge, corner, and transition. Thermally modified for enhanced durability and resistance, they're made to match the integrity of your build, inside and out.

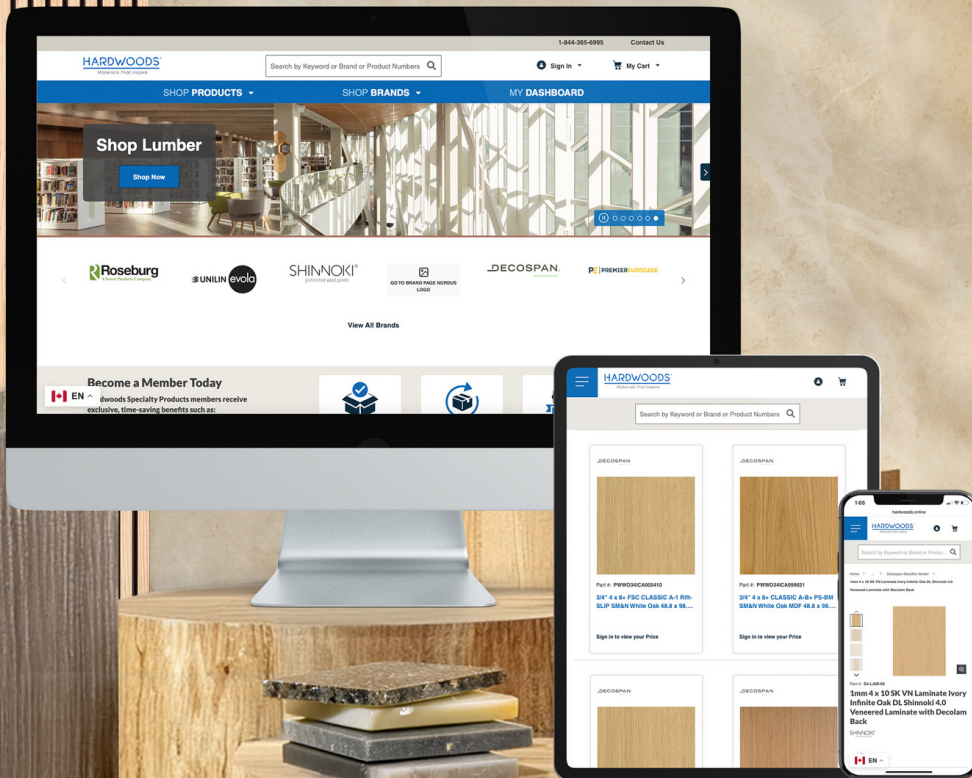

From subtle accents to bold frames, our trim and moulding lines up beautifully with sidings, ceilings, and cladding systems for a seamless, elevated look.

- Available in Clear Radiata, Ayous, and Ash
- Perfectly milled for clean lines and tight fits
- Thermo treated for stability and longevity
- Designed to complete the **Maximo** system – or stand out on their own
