QUERKUS®

FINEST OAK
COLLECTION

DECOSPAN.

“ We see it as our mission to produce the most beautiful and decorative oak veneered panels, enabling you to transform your most creative ideas into sensational interiors. ”

Every Decospan panel we produce is unique. We handle the available oak veneer creatively and with the utmost respect. Our unique production processes capture and enhance the beauty, colour, markings and structure of solid wood, and combine these with the many advantages of a veneered panel. The gleam of amazement in the eyes of our customers when they enter their living room, kitchen or office, gives us the ultimate sense of satisfaction.

INTELLIGENT

With Querkus, we have succeeded in capturing the capriciousness of nature in an accessible and easy-to-process product. No need to worry about product specifications; you can just focus entirely on the look and feel that will make your project unique.

AUTHENTIC

Querkus stands for an honest and authentic product. That's why, as well as processing new oak, we also give old oak beams a second lease of life. Veneer from old oak has a more seasoned and robust look. Recycling and upcycling at their best.

SUSTAINABLE

With Querkus we are working to reduce our environmental impact. We do this by making a product with a long service life, only working with oak from sustainably managed forests and by using environmentally-friendly production processes. This is all safeguarded in our Pure Wood Charter.

EUROPEAN

Oak is highly regarded in the furniture industry and in interior design. Because of its durability and excellent workability, oak has been used for many centuries in these parts. Our buyers are always searching for the best logs of European origin.

Querkus is a collection of decorative oak veneered panels. You choose the look, veneer thickness and surface finish to create the perfect board that suits your style completely. From now on you no longer have to worry about technical specifications because our simple step-by-step plan enables you to compose a product that will make your project shine.

Step 1: Choose the look

First you determine the appearance of your Querkus veneer product. Think carefully about the atmosphere you want to achieve as the end result. Depending on the chosen look, different veneer thicknesses are available, which you choose depending on the budget or the desired finishing.

For an extra solid look, veneer strips from different trees are combined using our unique mixmatch jointing method. This gives the boards a planked look but still fits together.

BRUSHED

A brushed surface does justice to the natural wood structure.

Brushed type B1: the soft summer wood is given a subtle and light brush treatment.

Brushed type B2 and type B3: the structure can be seen more in depth, with the effect being comparable to sand-blasting.

SCRATCHED

We use a patented procedure for an authentic-looking band sawn structure, giving the veneer panel the look of a solid wood plank, worked by craftsmen.

NO NONSENSE PURITY

Oak Natural

Natural brings the honest and endearing beauty of the oak to the fore. No frills, just pure nature. For this we use only strictly selected oaks, grown slowly in controlled and regulated growing areas.

The Natural panels are untreated enabling you to apply a wood stain or varnish finish according to taste. Wood oil also offers optimum protection, while retaining the veneer's natural feel and warmth.

RESPECTED, REPURPOSED & UPCYCLED

Oak Vintage

The Vintage series gives every interior a distinct and characterful look through the reuse of old oak beams.

For Vintage Original, oak beams that have served for decades as construction wood and train components are processed into veneer with a rich past and warm appearance.

OAK VINTAGE ORIGINAL

Harlem

Due to the different veneer origins and processing techniques, the different Vintage lines may not be used interchangeably in the same project.

Product overview

PEFC available on request.
FSC® available on request.

PANEL

Dimensions: 3050 x 1220 mm (10 x 4 ft) and 2500 x 1240 mm (8 x 4 ft)

Querkus' panels consist of two layers of veneer and an 18 mm-thick MDF board.
A veneered panel always needs a backing to guarantee the maximum stability of the panel.
The table below shows the possibilities.

Other cores and dimensions available on request.

Please note: surface area treatments (touch) on veneered panels with a coloured core (green/red/black) may sometimes suffer from slight colour seepage and we therefore strongly advise against using these.

Possibilities:

		 A/A QUALITY frontside and backside		 A/B+ QUALITY frontside backside		 A/B QUALITY frontside backside
